

CUSTOMER SATISFACTION ON BANKING SECTOR ON RURAL AREA IN ANDHR PRADESH: A CASE STUDY OF CHITTOOR DISTRICT

Dr.Y.Rajasekar

Principal, Department of Commerce, Subharam Govt. Degree College, Punganur, Chittoor District, A.P.

ABSTRACT

The banking sector like many other financial service industries is facing a rapidly changing market, new technologies, economic uncertainties, fierce competition and more demanding customers and the changing climate has presented an unprecedented set of challenges. Banking is a customer oriented service. Constant research is recommendable as customer needs and expectations constantly changes over time and new technological inventions and products keeps on changing. The present study has some limitations and it is very essential to recognize them to re- fine future researches. First the study is limited in three cities which do not represent the all branches and outlets across the country. Second, the survey questionnaire was given during bank hours; respondents may not have had time to respond because of the lack of time, stress and pressure at work. For the future research, more related at-tributes can be added to make the survey more precise and more applicable to the bank industry. The research form can take the same method as this research or modified to fit the own criteria more specifically. The further research should be conducted continuously being based on both employee and customer satisfaction and then the data should be stored in their in-house system over time in order to monitor the changes. Customers are fairly satisfied with the scheme of loan products of banking sector. Most people are still unknown about the provided scheme or it could be as if the process to get loan from bank is too difficult. The bank should study more about the matter. Customers seem to be very satisfied regarding the deposit product however employee con- tact relationship seems to be poor. The main focus on this paper customer satisfaction on banking sector in Andhra Pradesh: A case study of Chittoor district.

Key Words: *Banking, Financial, Customers, Unprecedented, Recommendable, Satisfaction.*

Introduction

Customer service proves to be one of the most important factors governing business. Today business organizations are more customers-focused than ever before since customer satisfaction is a competitive advantage which is sustainable over the long term (Schnaars, 1991). The business organizations to create healthy customer relationships should always focus on listening to customers' expectations, requirements, complaints and needs. Making polite suggestions, delivering promises and taking extra effort such as building an efficient customer service team are the right practices to retain them for a long period. Satisfied customers mean a long term profitable business since they stay loyal to the business.

Customer satisfaction in the banking industry plays a vital role to create a healthy business status being service based industry. In any service based industry customer service is at highest priority. Customer service can be provided by well trained person in planned systematic manner or can be provided by means of well planned self-service. In banking industry customers are more directly linked with the banks' personnel for any kind of services or products. Therefore, Banks should always focus on training its front desk staffs to provide quality service knowing their expectations and wants.

Theoretical framework of this research is centred to service quality created by satisfied employee to meet up customers' expectations. The study employs Gap Model of Customer Satisfaction to find out the gap between customers' perception and expectation, Herzberg two factor theories to find the level of employee satisfaction analysing their different motivational and de-motivational factors, Profit chain Model to show the relationship between satisfied employees and created quality service to meet customers' expectation and ISO Guideline to show and measure different attributes of customer satisfaction. (Gumesson, 2002)¹

Customer Satisfaction In banking Sector

Customer satisfaction can't be limited to short term strategy it's a long term strategy of any firm. It has been increasingly popular due to its helpful attribute towards judgment of the customer preferences and choices. It simplifies the decision maker role and helps to take any major or minor decision to cater customer. (Schnaars, 1991)²

When expectation of customers is matched the resultant feeling is satisfaction and when expectation does not match than the resultant feeling is dissatisfaction. Some of the scholar believes that it can also be called as motivation. (Engel et al. 1990)³

Customer satisfaction can be improved by strong communication to customer. A firm should know what customer expectation are and implement their expectation to make the customer satisfied. (Customer Satisfaction, 2007)⁴ There should be a broad level of surveys, customer feedback collected to random set of people in a frequent interval time. Customer satisfaction is an innovative process as product differentiation and pre- senting it in a unique flavour thus add more value towards the mind of customer.

REVIEW OF LITERATURE

The research studies in the field of banking sector of customer satisfaction the main review of literature as follows:

Md. Mobarak Karim, Md. Abdul Latif Mahmud (2018)⁵, in their article entitled "Customer Satisfaction in Banking Sector: A Case Study on Janata Bank Limited ", it can be concluded that Customer satisfaction has become important issues of bank industry to achieve goals of the bank. The success or failure of every organization depends on customer satisfaction. Despite competition among banks in Bangladesh the Janata Bank Limited has achieved good reputation around Bangladesh. It has to compete with not only State-owned bank but also private commercial banks. Though the Janata Bank Limited has lack behind in many sectors such as online banking but still people are investing in this bank because of its good reputation.

Aayasha Nawaz and Dr. Deepak Mishra (2018)⁶ in their article entitled "Customer Satisfaction in Banking Industry: A Case Study", it is concluded that Customer satisfaction is one of the major parameters for the service providers in the Indian banking sector. Indian retail banks would be able to face the competition better if the requirements and the expectations of the customers are known. This necessitates the understanding of the factors contributing to customer satisfaction. Although existing studies have tried to understand the factors, the determination of the factors has been done based on existing models of customer satisfaction. This required an exploratory study to find the factors contributing to customer satisfaction in retail banking. From the existing literature, none of the previous researchers seem to have done it for the retail banking sector.

Objectives of the Study

The main objectives of this project work are to study socio-economic information and customer satisfaction on banking sector. The objectives of the study are as follows

1. To study the socio economic profile of the bank account holders.
2. To study the customers satisfaction on rural area towards banking services.

Research Methodology

This study reveals that the socio economic profile of the bank account holders and customer satisfaction towards banking services. The sample data size consists of 20 respondents from Chittoor District and data have been collected during the period from June 2022 to July 2022. The collected data tabulated, analysed and interpreted with the help of percentages for the analysis.

Data Sources

The data required for the study have been collected from both primary and secondary sources. The Primary data have been collected through the interview schedule methods from the bank account holders. The secondary data have been collected from different sources like journals, magazines, books and various websites.

SOCIO ECONOMIC PROFILE OF THE BANK ACCOUNT HOLDERS

Before presenting the main them of the paper a back-drop of the sample respondents is presented in the following primary data. This to study the socio economic profile of the bank account holders and to study the customers' satisfaction towards banking services. Location of the respondents is presented in the table 1

Table 1: Location of the Respondent

S. No	Location	Frequency	Percent
1	Rural	15	75.0
2	Urban	5	25.0
Total		20	100.0

Source: Field Survey

Table 1 show that the location of the respondents rural and urban areas in banking sector in rural and urban areas. Among 20 sample respondents 15 (75.0 per cent) respondents are having the rural area and 5 (25.0 per cent) are having urban area. It is concluded that majority of the sample respondents are rural areas.

The Gender is presented in the table 2

Table 2: Gender

S. No	Gender	Frequency	Percent
1	Male	14	70.0
2	Female	6	30.0
Total		20	100.0

Source: Field Survey

Table 2 show that the gender of the respondents banking sector in rural and urban areas. Among 20 sample respondents 14 (70.0 per cent) respondents are having the male and 6 (30.0 per cent) are having female. It is concluded that majority of the sample respondents are male population in areas. The age is presented in the table 3

Table 3: Age

S. No	Age	Frequency	Percent
1	20 to 30 Years	5	25.0
2	31 to 40 Years	8	40.0
3	41 to 50 Years	4	20.0
4	Above 51 Years	3	15.0
Total		20	100.0

Source: Field Survey

Table 3 show the age groups of the respondents banking sector in rural and urban areas. Among 20 sample respondents highest of 8 (40.0 per cent) respondents are having the 31 to 40 years and lowest of 3 (15.0 per cent) is respectively. It is concluded that majority of the sample respondents are 40 per cent of the high income of customers. The education qualification is presented in the table 4

Table 4: Education Qualification

S. No	Education	Frequency	Percent
1	illiterate	3	15.0
2	SSC	11	55.0
3	Intermediate	4	20.0
4	Graduate	2	10.0
Total		20	100.0

Source: Field Survey

Table 4 show that the education qualification of the respondents banking sector in rural and urban areas. Among 20 sample respondents illiterate is 3 (15.0 per cent), SSC is 11 (55.0 per cent), intermediate is 4 (20.0 per cent) and Graduate is 2 (10.0 per cent). It is concluded that majority of the sample respondents are SSC qualification in areas.

Customers Satisfaction on Rural Area towards Banking Services

Overall satisfaction is presented in the table 5

Table 5: Overall Satisfaction

S. No	Satisfaction	Frequency	Percent
1	Yes	17	85.0
2	No	3	15.0
Total		20	100.0

Source: Field Survey

Table 5 show that the overall satisfaction of the respondents banking sector in rural and urban areas. Among 20 sample respondents 17 (85.0 per cent) respondents are having the high satisfied and 3 (15.0 per cent) are not satisfied of the banking sector. Overall satisfaction graph is presented in 5.a

Table 11 show the satisfaction on Deposits and Withdraws of the respondents banking sector in rural and urban areas. Among 20 sample respondents 16 (80.0 per cent) respondents are having the satisfied and 4 (20.0 per cent) are not satisfied of the Deposits and Withdraws. It is concluded that majority of the population is Deposits and Withdraws satisfied. The Satisfaction on Loan Facilities is presented in the table 12

Table 12: Satisfaction on Loan Facilities

S. No	Satisfaction	Frequency	Percent
1	Yes	7	35.0
2	No	13	65.0
	Total	20	100.0

Source: Field Survey

Table 12 show the satisfaction on Loan Facilities of the respondents banking sector in rural and urban areas. Among 20 sample respondents 7 (35.0 per cent) respondents are having the satisfied and 13 (65.0 per cent) are not satisfied of the Loan Facilities. It is concluded that majority of the population is Loan Facilities not satisfied.

Summary of Findings

1. Among 20 sample respondents 15 (75.0 per cent) respondents are having the rural area and 5 (25.0 per cent) are having urban area. It is concluded that majority of the sample respondents are rural areas.
2. Among 20 sample respondents 14 (70.0 per cent) respondents are having the male and 6 (30.0 per cent) are having female. It is concluded that majority of the sample respondents are male population in areas.
3. Among 20 sample respondents highest of 8 (40.0 per cent) respondents are having the 31 to 40 years and lowest of 3 (15.0 per cent) is respectively. It is concluded that majority of the sample respondents are 40 per cent of the high income of customers.
4. Among 20 sample respondents 13 (65.0 per cent) respondents are having the married and 7 (35.0 per cent) are having unmarried. It is concluded that majority of the sample respondents are married population in areas.
5. Among 20 sample respondents 19 (95.0 per cent) respondents are having the high satisfied and 1 (5.0 per cent) are not satisfied of the banking ATM services. It is concluded that majority of the population is ATM services is very satisfied.
6. Among 20 sample respondents 4 (20.0 per cent) respondents are having the satisfied and 16 (80.0 per cent) are not satisfied of the online banking services. It is concluded that majority of the population is online banking services is not satisfied.
7. Among 20 sample respondents 16 (80.0 per cent) respondents are having the satisfied and 4 (20.0 per cent) are not satisfied of the payment app. It is concluded that majority of the population is payment apps not satisfied.
8. Among 20 sample respondents 15 (75.0 per cent) respondents are having the satisfied and 5 (25.0 per cent) are not satisfied of the banking charges. It is concluded that majority of the population is banking charges not satisfied.
9. Among 20 sample respondents 10 (50.0 per cent) respondents are having the satisfied and 10 (50.0 per cent) are not satisfied of the interest on savings. It is concluded that majority of fifty per cent of the population is interest on savings not satisfied.
10. Among 20 sample respondents 16 (80.0 per cent) respondents are having the satisfied and 4 (20.0 per cent) are not satisfied of the interest on savings.

cent) are not satisfied of the Deposits and Withdraws. It is concluded that majority of the population is Deposits and Withdraws satisfied.

11. Among 20 sample respondents 7 (35.0 per cent) respondents are having the satisfied and 13 (65.0 per cent) are not satisfied of the Loan Facilities. It is concluded that majority of the population is Loan Facilities not satisfied.

Conclusion

It is concluded that the Customers are fairly satisfied with the scheme of loan products of Banks. Most people are still unknown about the provided scheme or it could be as if the process to get loan from bank is too difficult. The bank should study more about the matter. Customers seem to be very satisfied regarding the deposit product however employee contact relationship seems to be poor. Either the employees may not be well trained to serve customers in right way or time to serve many customers in a day could be the main reason behind the dissatisfied customers. Customer education is simply the process by which people are taught about various goods and services in detail so that the consumer would get the maximum satisfaction and utilization of it. There are lots of advantages of consumer education such as it acts as feedback for the business, the interaction between consumer and producer helps to standardize the products and services in Chittoor district of Andhra Pradesh. Among 20 sample respondents 19 (95.0 per cent) respondents are having the high satisfied and 1 (5.0 per cent) are not satisfied of the banking ATM services. It is concluded that majority of the population is ATM services is very satisfied. Among 20 sample respondents 4 (20.0 per cent) respondents are having the satisfied and 16 (80.0 per cent) are not satisfied of the online banking services. It is concluded that majority of the population is online banking services is not satisfied. Among 20 sample respondents 16 (80.0 per cent) respondents are having the satisfied and 4 (20.0 per cent) are not satisfied of the payment app. It is concluded that majority of the population is payment apps not satisfied.
